CLINICAL STAINLESS

Hipac has been manufacturing healthcare products for over 30 years.

Our complete in-house design, manufacture and assembly process means that we have an Australian made product that will perform in the most demanding healthcare environments today.

From custom made, one off items through to our in stock, off the shelf products, Hipac should front of mind when choosing your clinical furniture partner.

If you are looking for quality Australian Made clinical stainless steel furniture that's guaranteed to be here for life, speak to one of our consultants today by phone on +61 2 4823 0000 or 1800 75 93 93 or via email at info@hipac.com.au.

Hipac

We're here for life

DELIVERING TAILOR-MADE SOLUTIONS FOR OVER 30 YEARS

Hipac has been manufacturing high quality healthcare products for more than 30 years. That is 30 years of experience that has brought about an extensive range of products that were specifically developed due to a strong demand from healthcare facilities, seeking high quality, well made, locally manufactured healthcare furniture with a short lead time. Hipac's clients were also looking for cost effective solutions that could withstand years of use in demanding healthcare environments.

Consequently, Hipac now has an efficient in-house design, manufacturing and assembly process locally, so all our customers are assured of a 100% Australian-made product.

The reason Hipac stands apart from its competitors is the company's vision and ability to produce custom-made healthcare furniture solutions, in addition to a broad range of off-the-shelf products. Here is a company that prides itself on being able to produce one of a kind, made-to-measure items. This is because they recognise that there is no such thing as a one-size-fits-all solution. No two work environments are the same, and every job therefore presents its own unique opportunities and challenges.

Consider the advantages of individually handcrafted Australian made furniture

Every customised product that Hipac creates is individually handcrafted from Australian-sourced, medical-grade stainless steel. Importantly, each item is always designed to meet the end user's very specific needs and preferences. Whenever you order a piece of bespoke Hipac stainless steel furniture, you can be sure it will be:

· Designed to perfectly fit the space in which it will be placed, used or stored, taking the size, shape, layout and any other relevant features of that space into account;
· Designed to meet whatever other specifications might be required (e.g. in terms of portability, adaptability, strength, infection control needs and/or suitability for use in sterile environments);

· Designed to help minimise the risk of accidents, injury or damage (i.e. we can devise ways to help address identified potential sources of risk).

Hipac's overall aim when creating a customised piece of stainless steel furniture is to produce something that is perfectly adapted for its environment and intended use. This makes things easier for the people who will be using it and – in turn – helping them best meet the needs of their patients.

This is why Hipac should be your partner of choice when it comes to choosing a provider of stainless steel furniture where you work.

Hipac stainless steel furniture

- ✓ Made in Australia, using medical-grade stainless steel
- ✓ Carefully crafted to meet your specific needs & preferences
- ✓ Easy to use
- ✓ Highly durable
- ✓ We guarantee to stand behind all our medical products.

If you're looking for high-quality stainless steel furniture which harnesses the expertise of a company that's been satisfying customers for more than 30 years then speak to one of our consultants today.

Standard inclusions on any Hipac trolley
Undershelf Bracing
Full undershelf bracing support for all shelves providing maximum stability and strength.

Double Safety Folds to all Shelf Edges
We believe that your new trolley should be easy to use without the risk of injury.

Precision Ball Bearing Castors
We design all of our trolleys with WH&S in mind. Precision ball bearing castors allow the weight of the unit to be carried and moved by the bearings rather than by manual exertion. See our castor page for the range of castors available.

The Hipac Logo - means we guarantee to stand behind our locally manufactured products

Full extension drawer runner - increases the life of the trolley by reducing impact on the drawer and protects its contents

Undershelf bracing - full under bracing support for all shelves providing maximum stability and strength

COLOURED DRAWERS

Coloured drawers are both aesthetically and organisationally savvy - you can simply mix and match these coloured drawers to configure a totally unique trolley to suit your objectives.

We use these in theatres to identify which equipment belongs in each theatre.
Priced on enquiry.

MADE IN AUSTRALIA
EQUIPMENT ETCHING

Etching your equipment allows you to easily identify where it belongs.
Priced on enquiry.

MADE IN AUSTRALIA

DRAWER DIVIDERS

Keep your drawers neat and tidy with Hipac drawer dividers

The clear adjustable system lets you customise your drawer as needed without compromising your ability to visualise the items inside the drawer.

Sold in kits per drawer as follows:

50mm divider height

Drawer Size	Code
490 x 490mm	136500
600 x 490mm	136502
750 x 490mm	136504
900 x 490mm	136506

85mm divider height

Drawer Size	Code
490 x 490mm	136501
600 x 490mm	136503
750 x 490mm	136505
900 x 490mm	136507

MADE IN AUSTRALIA

DRAWER LINERS

Our foam drawer liners protect your equipment by reducing the possibility of movement inside the drawer. They are reusable and machine washable.

Drawer Size	Code

COMPACTUS (custom per job)

Compactors allow maximum use of the existing area and are custom designed to suit your product and storage parameters. Installing a compactus will increase storage space by up to 40%.

Compactors are custom made for each installation in order to gain maximum space efficiency. They can be manufactured in any of our shelf sizes to suit your product and storage parameters. Even with large or bulky goods, the compactus mobiles have ball bearings mounted at the track guide, to ensure streamlined movement of each mobile bay.

Our compactors are unique in that they have two specially designed overhead rails which allow static shelving units to move along tracking rails to access goods required. This ensures dust won't collect in bottom rails, as some compactors are designed. Hipac can design your top track compactor with multiple bays of various depths and widths.
