

Anti-Ligature Window Curtain Tracking Kit

Features

The window curtain track is a white powder-coated aluminium track that is lightweight yet strong, and with roller runners, is ideally suited for ease of use in all hand-drawn curtain applications. Tests have shown that for anti-ligature purposes it is most important that the complete track collapses leaving no point of ligature. Even where a fixed track provides no ligature points, heavy weights can be suspended from the curtains which in turn is a serious potential risk. With the Anti-ligature window curtain tracking kit, the track and curtain together will part from the brackets under abnormal load and can then be simply and quickly reinstated.

Benefits

- built with a robust aluminium profile for consistently high performance, an excellent choice for medium to heavy curtain usage
- offering both wall-fix and top-fix options to blend in well with any environment whilst remaining pleasing to the eye
- with special low friction roller runners, satisfies the most demanding of environments, whether it be residential or commercial
- secured by magnetic brackets for anti-ligature functionality

Specification

The magnetic anti-ligature hand-drawn window curtain track as supplied by Hipac. Aluminium track with white powder-coated finish. Incorporating low friction roller runners at 16 per metre and magnetic wall-fix or top-fix brackets as necessary, spaced by manufacturer’s recommendations. Fitting to be carried out by trained and accredited staff.
