

## Secure Floor Mounted Doorstop with Magnetic Hold Open

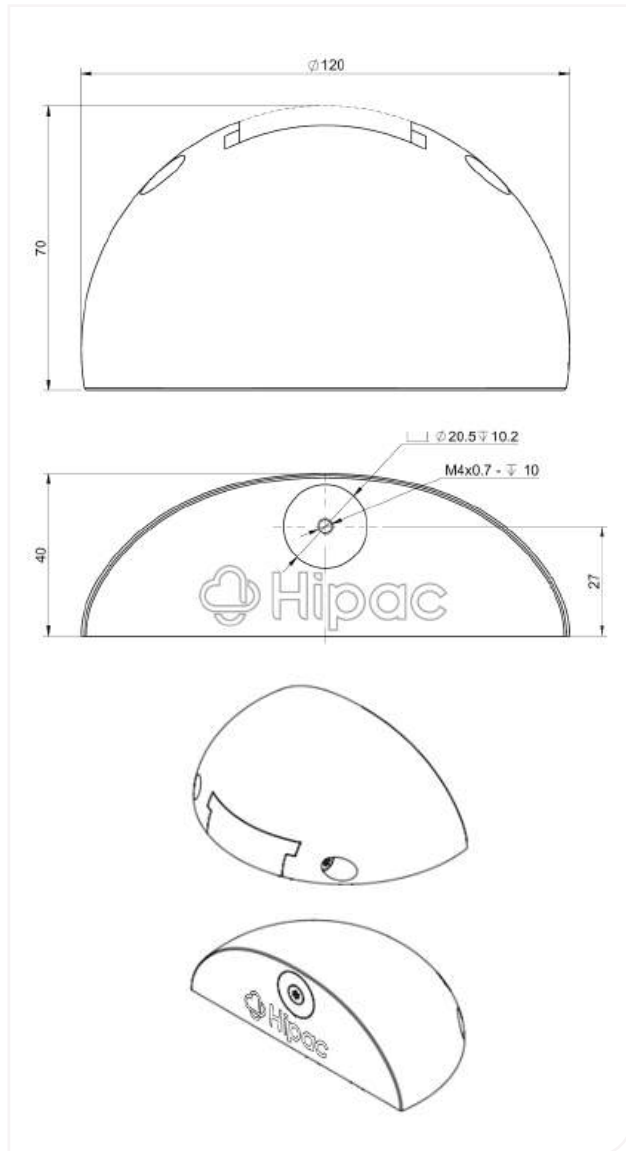

The Hipac Magnetic Floor Mounted Doorstop is securely fixed to the floor and incorporates a magnetic hold-open mechanism to hold doors in the open position. It is designed to restrict the opening angle of the door, minimising the risk of damage to both the door and the wall. To engage the hold-open mechanism, the user simply opens the door until it touches the magnetic stop. To release the door, the user tugs or pushes it away from the stop. The holding strength is adjustable.

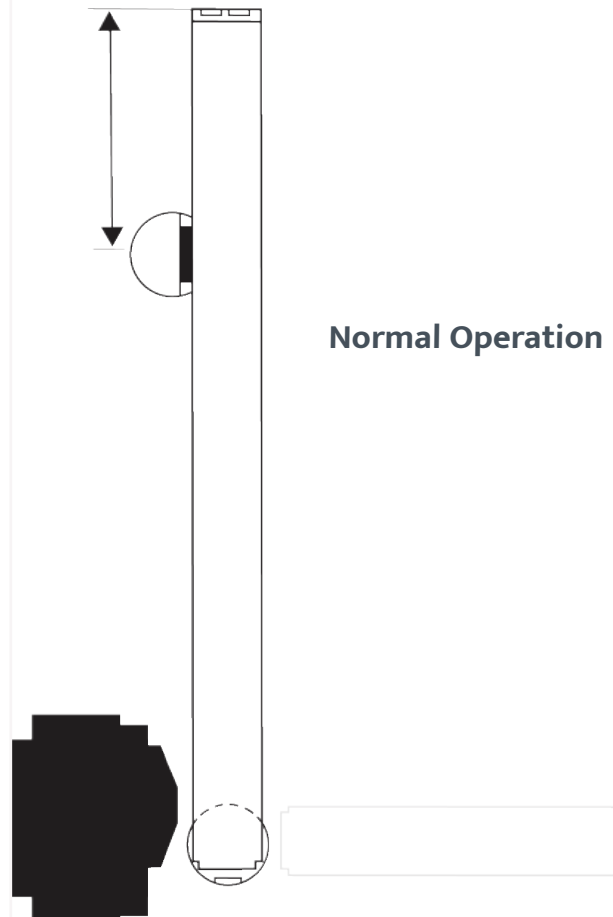

This doorstop is ideal in areas where a door closer is required but temporary hold-open is also needed, e.g. easy access for elderly or disabled consumer or staff check in.

N.B. To be effective, it is recommended that the doorstop is fitted in the final third of the door leaf.

Doorstop to be installed in the final 1/3 of the door leaf.

#### Disclaimer:

All products must be fitted as per the directions detailed in the individual product Installation Instruction Document. Hipac takes no responsibility for incorrect installation/operation of the product. By purchasing this product, you are confirming that the product will be fitted as per the instructions.

Please note that Hipac offers a range of measures designed to reduce the risk of self-harm or suicide and does not offer any guarantee that it will not take place. The solutions have been designed as a deterrent only.

#### ABOUT HIPAC

Operating at the forefront of healthcare, we strive to redefine what's possible. We provide superior products, design expertise and total solutions to help create environments where nothing stands in the way of patient care.
